

Handcrafted with durable reinforced concrete and detailed to look like the real thing! The Dog Through the Log is designed to easily accommodate our larger friends (like Sage the Bernese Mountain Dog below!) with a generous 30" height and length of 48". Just like all of our NatureDog components, it features heavy duty flanges to accommodate anchor bolts for permanent installations or landscape staples for more flexibility. These unique components accentuate the natural environment and no two pieces are exactly alike.
