

DOG ON IT PARKS

DOG-ON-IT-PARKS.COM

The A-Frame is one of the most popular pieces of dog park equipment; it requires your dog to walk up the incline and down the other side. Only three feet high at the peak and extra wide 38" planks make this appropriate for all sizes and skill levels. Our A-Frame also features yellow safety contact zones and features rust-proof aluminum materials and stainless steel vandal-resistant hardware for use in any environment. Two standard color options available – custom colors available at additional price.
