Our S-Tunnel features our exclusive PolyGrip™ texture that is embedded into the plastic during the molding process. Unlike slippery playground tubes that can easily cause a dog to lose its footing, ours provides years of slip resistant texture. The extra wide 27” diameter also allows access for dogs of all sizes and the careful arrangement of the “S” shape means dogs can always see through to the other end. The customizable doghouse panel provides a touch of fun and is available in two color options.
