

The Canine Crossing is one of a kind! With a 47" long bridge section and two large support boulders, it features natural colors from crushed rock and sand which offer variation and slip resistance. Like all our NatureDog™ components, it has heavy duty flanges to accommodate anchor bolts for permanent installations or landscape stakes for more flexibility. These unique components accentuate the natural environment and with a hand-painted finish and matte clear coat, no two pieces are exactly alike.

# NAT7126 CANINE CROSSING

---
