

Say goodbye to that wet dog smell! Our K9 Dryer is a compact, variable speed force dryer that easily adjusts from 0-120 CFM (cubic foot/minute) so you have control over the airflow for powerful, quiet and efficient grooming. With heat that varies from 75 degrees F to 120 degrees F (determined by air temperature and speed of dryer), this helps to ensure a comfortable experience for your pooch. The K9 Dryer offers a sturdy 18-gauge powder coated steel housing, 10' hose with both round and flat blower tips, and makes drying easy for both you and your pet.
